PROFILE

IIIT Gwalior Electrical and Electronics Engineering student targeting a software engineering internships. Built projects across REST APIs, full-stack workflows, and IoT monitoring, with foundations in C++, data structures and algorithms, operating systems, databases, and computer architecture. Interested in contributing to secure, dependable technology for digital payments.

EDUCATION

Indian Institute of Information Technology Gwalior (IIIT Gwalior) **Aug. 2024 – Jul. 2028**

B.Tech, Electrical & Electronics Engineering

CGPA: 8.20/10 (through Sem. 4) | SGPA (Sem. 4): 8.91/10 | JEE Main: 98.12 percentile

S.D. Inter College, Meerut (UP Board)

Class XII: 87.0% | Class X: 85.0%

TECHNICAL SKILLS

Languages: C++, C, JavaScript (ES6+), SQL, Kotlin, Java.
Core Fundamentals: DSA, OOP, Operating Systems, DBMS, Networking (TCP/IP, DNS, sockets), Computer Architecture.
Cloud & Tools: Git/GitHub, Docker, Docker Compose, Postman, Cloudinary, Linux/Bash, MATLAB, CI/CD Fundamentals.
Web & Backend: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, REST APIs, Tailwind CSS, Next Auth.js.

Video/ Photo Editing: Capcut, Filmora, Picsart, Lightroom, VN .

Containerised Full-Stack Recruitment Platform (Demo) **Jul. 2026 – Present**

MERN, Docker, Redux Toolkit, Cloudinary, Multer, JWT, REST APIs

- Docker Compose isolated client/server, eliminating config drift and cutting setup from ~8 minutes to under 30 seconds.
- Secured 15+ Recruiter/Candidate REST endpoints with RBAC, JWT, HTTP-only cookies (maxAge 24h, sameSite).
- Multer/Cloudinary Data-URI streamed PDF resumes/logos asynchronously, avoiding disk I/O; uploads under 400ms.
- Redux Toolkit/Persist and Mongo indexes cut repeat calls across 80+ companies; six-field $or regex search under 25ms.

GetMeFunding – Micro-Payments & Creator Crowdfunding Hub (Demo) **May. 2026 – July. 2026**

Next.js, Razorpay, NextAuth.js, MongoDB, Tailwind CSS

- Next.js Server Actions cut API boilerplate/request waterfalls ~35%; isolated multi-tenant creator credentials enable zero-downtime key rotation.
- Razorpay Orders API enabled dynamic checkout/status reconciliation; payment initiation under 300ms.
- MongoDB .lean() and to_user/amount indexes cut leaderboard memory ~50% and response time from 85ms to under 20ms.
- $set/updateMany username migrations kept historical payment records consistent, with zero orphaned entries.

Smart Industrial Production Line Monitoring System **Sept. 2025 – Nov. 2025**

IoT, Edge Computing, C++

- Edge device sampled vibration, temperature, load, and alignment continuously at 50 Hz for predictive maintenance.
- C++ edge detection flagged slippage/bearing wear in <80ms of threshold breach, helping prevent motor failure.

ACHIEVEMENTS

- 2nd Prize, National Indux 5.0 Hackathon (₹75,000); Reliance Foundation Undergraduate Scholar; AppInventiv Scholar.
- Selected for IISc Bangalore Summer School in EE research (AI/ML and computer vision); solved 550+ LeetCode/GeeksforGeeks problems.

LEADERSHIP & ACTIVITIES

Executive Member, Student Activity Council (Cultural) — campus festivals and logistics for 1,500+ attendees.
Mentor, Student Gyan Movement; Executive Member, Uthaan — teaching, hackathons, coding workshops, and technical writing.
Interests: acoustic guitar and creative filmmaking.

CERTIFICATIONS

IBM Applied DevOps Engineering: DevOps, Docker/Kubernetes, Agile/Scrum | Google IT Support: Networking, Operating Systems, Linux
Databases and SQL for Data Science with Python (IBM/Coursera)
